SKILLS

- Creating responsive webpages for both desktop and mobile devices through semantically clean HTML/CSS.
- Knowledge of HTML5, CSS3, HAML, SASS, Git, JavaScript, jQuery, Photoshop, SEO and Responsive Web Design.
- Understanding of cross-browser coding, web standards and best practices.
- Ability to read and modify Ruby on Rails, PHP and Python.

EXPERIENCE

November 2014 – Present

Web Developer (Intern) · Manchester · New Hampshire

Studio Mystic

- Code and implement responsive WordPress sites from Photoshop layout through Html/CSS to a custom theme, functions, and plugins.
- Use of JavaScript and jQuery to optimize the websites
- Facilitate client WordPress training, site document and maintenance.

September 2009 – November 2010

Ruby on Rails Front-End Web Developer · Bangkok · Thailand

Safecom's Network Security Consulting Co. Ltd.

- Sliced and diced PSD files into HTML and CSS
- Utilized HAML and SASS to develop and maintain the front-end functionality of websites.
- Used Git to collaborate with other team members.
- Created email templates for company and clients.
- Addressed cross-browser compatibility issues as well as error checking.
- Participated in discussions with clients to clarify their needs.
- Comfortable with multi-tasking and effectively worked on multiple projects simultaneously.
